### ***Abstract***

*Guiding contemporary college students of high quality group to establish socialist core values is the urgent need of cultivating socialist builders and successors in China, and it is also the basic task of ideological and political work in colleges and universities. To effectively enhance the effectiveness of socialist core values education, it is necessary to enrich and expand the practical path of values education. Socialist core values education for college students is a systematic project, for which we should organically and closely combine family education, school education and social education, not only to give full play to the independent roles and functions of each aspect, but also to coordinate the relationship between these three aspects, so as to form an all-round coverage and seamless docking pattern of socialist core values education and give full play to the overall synergy effect.*

### ***Keywords***

*college students, socialist core values, education*

General Secretary Xi Jinping clearly pointed out in the report of the 19th Party Congress that the core socialist values should be cultivated and practiced. It is necessary to focus on cultivating the new man of the times who will assume the great responsibility of national rejuvenation, strengthen education guidance, practice cultivation and institutional guarantee, give play to the leading role of socialist core values in national education, spiritual civilization creation and the creation, production and dissemination of spiritual cultural products, integrate socialist core values into all aspects of social development, and transform them into people's emotional identity and behavioral habits. Therefore, in today's vigorous cultivation and practice of socialist core values, we must attach great importance to the education of socialist core values for college students, so that they can integrate the realization of their personal values with the overall social values and mainstream values, and make their own values meet the needs of society and the value direction and value standards in line with the development trend of the times.

Education on socialist core values for college students is a systematic project, for which we should organically and closely combine family education, school education and social education, not only to give full play to the independent roles and functions of each aspect, but also to coordinate the relationship between these three aspects, so as to form an all-round coverage and seamless docking pattern of education on socialist core values and give full play to the overall synergy effect.

### **1. Play a Leading Role in School Education**

Cultivating and practicing the socialist core values should start at a young age and from school. School education plays a crucial role in shaping the socialist core values of contemporary college students. In order to play the role of school education, first of all, we should establish and improve the working mechanism of “unified leadership of the party committee, unified management of the party, government, industry, and labor, each department taking its own responsibility, and all teaching staff educating people, educating people in the whole process, and educating people in all aspects.” Let educators at all levels have rules to follow and evidence to rely on when carrying out education on socialist core values for college students, and effectively perform their duties of serving core values education for college students. Secondly, we should take ideological and political theory class as the main channel and main position of socialist core values education. Civics class is the key course to implement the fundamental task of establishing moral education, and the role of Civics class in cultivating socialist core values can consolidate the guiding position of Marxism in the ideological field in a more grounded way, promote the spirit of patriotism, national spirit and the spirit of the times in a more targeted way, strengthen the education of ideals and beliefs of youth in a more affinity way, and help students form a correct world view, outlook on life and values, It is of great practical significance and far-reaching historical significance to cultivate socialist builders and successors with comprehensive development of moral, intellectual, physical, aesthetic and labor. Finally, the inculcating effect of campus culture is brought into play, and lively forms are used to build a socialist core value system, to build excellent school, teaching and learning styles as the core, to optimize and beautify the campus environment, to build a campus culture that reflects the socialist core value system, the characteristics of socialist culture, the characteristics of the times and the characteristics of the school, and to take colorful campus cultural activities as an effective way to The core socialist values education is carried out in an effective carrier.

### **2. Play the Basic Role of Family Education**

The family is the context in which a child develops a primitive sense of self and forms basic identities, motivations, values and beliefs. This statement fully affirms the fundamental role of family education in the educational process. First of all, parents play an important role in the family and have an initial and far-reaching influence on the child; it can be said that the child’s first teacher is his or her parents. Secondly, family education is a very long process. School education is a phase, but family education is a lasting and uninterrupted process. Moreover, family education not only focuses on the development of

knowledge and ability but also involves life skills, ethics and morals, and plays a role in transmitting values. Finally, the influence of family education is mainly a kind of implicit education, which is carried out in a subtle way. The above characteristics of family education make it the most powerful assistant of school education and an indispensable part of social education. College students' education of socialist core values is certainly inseparable from college education, but it is also directly related to their family education. As parents of students, they should abandon the wrong idea that "education is only the responsibility of schools" and consciously cultivate the formation of correct values of their children through correct family education. On the one hand, to create a good family atmosphere, family members should have equal, harmonious, relaxed, democratic interpersonal relationships, mutual understanding, mutual understanding, mutual help, to achieve the love of husband and wife, children filial piety, parents kindness, siblings modesty and love; on the other hand, to improve the level of parental education and their own ability, parents' own language expression ability, analysis and problem-solving ability, the stronger the ability to work and social interaction, The stronger the parents' ability to express themselves, analyze and solve problems, work and social interaction, the more they can become role models for their children to teach by example. In addition, family education closely cooperates with school education to form educational synergy, which is more conducive to cultivating college students to form correct values. As parents, they should communicate with school teachers frequently, understand all aspects of the students' situation, listen carefully to teachers' opinions and suggestions, grasp the correct direction of family cultivation, and take corresponding measures in a targeted manner.

### **3. Utilizing the Environmental Role of Social Education**

Core values are the values that play a decisive role in a society and determine the development direction of the whole society. College students' socialist core values education cannot be separated from the influence of the general social environment. As far as the social level is concerned, the key to the good effect of the socialist core values of college students lies in the healthy social climate shaped by the whole society. Faced with the diversified and complex forms in the field of social values and various tides of thought, the Party and the government need to advocate the monolithic orientation of socialist core values at the strategic level to lead the diversified value orientations and fully reflect the spiritual power of socialist core values. Firstly, to fully integrate the socialist core values into the construction of the rule of law, enhance the awareness and ability of college students to resist the corrosion of socially improper winds, and promote the formation of a value concept generally recognized by society as a whole, full of positive energy and a social ethos of virtue and goodness. Secondly, we should insist on using the core socialist values to forge the soul and educate people, deepen the education of people's feelings and family feelings, spread the big influence by micro media, interpret the big theme by small stage, and play the big effect by the people around us, so as to guide college students to continuously improve social virtue, professional ethics, family virtue and personal virtue in a subtle way. Finally, we should pay attention to the guiding role of social practice. Rich social practice activities can not only enhance students'

understanding of social phenomena, but also transform the single education mode into an experiential teaching mode, which can eventually enhance college students' understanding and recognition of socialist core values and form correct value judgment.
