

## Research Note

# Thought Line Synopsis for a TV Series Screen Script: ADVANCE

Prof. M. Radh Achuthan<sup>1\*</sup>

<sup>1</sup> Prof. of Physics, Long Island University, Brooklyn,, NY, USA

Received: November 3, 2020 Accepted: November 9, 2020 Online Published: November 16, 2020  
doi:10.22158/sss.v1n2p84 URL: <http://dx.doi.org/10.22158/sss.v1n2p84>

This **research note** consists of **three** parts, **A, B, C**.

**A.** Why am I writing this research note?

Despite blessings of the digital age for the human, a majority of the global population is disinclined, unlikely, or unprepared, to access material in print.

In general **audio-visual communication has better reception**. So such communication on the contents needs to be facilitated.

Communication with *itself* is essential for “human Capital” to create new expressions / programs.

People in the field indicated that given availability of the two published articles, a **“thought line synopsis”** based on the same **for a screenplay**, is desirable.

That need could be addressed by an able someone writing a screen script based on these ideas for a TV series, its performance by able male and female communicators, and dubbing the series later in local language for global distribution.

+++++

**B.** The **research note** presenting this “Thought Line Synopsis” is based on two published articles, below:

1. **Qualitative Aspects for Society of Strong Artificial Intelligence**

Prof. M. Radh Achuthan

<http://www.scholink.org/ojs/index.php/sss/issue/view/378>, and

<http://www.sciencepublishinggroup.com/journal/paperinfo?journalid=323&doi=10.11648/j.ash.20180406.14>

The goal in this research note is to provide readily available material for the creation of a screen script for a multi -episode TV series **for the global general Public** who are disinclined / unlikely or unable even in this digital age to read viewpoints in print.

1. A 2020+ **screen script** based on the composition of ideas presented in this synopsis and delivery of the same via a TV series may serve that end over the **“Intermediate Future”** of the next couple of decades.

2. The transition from Pre Covid-19 business practices to **regionalized** Universal Basic Income, UBI practice everywhere in the world can be achieved. This societal transition, facilitated by AI and energized by the Sun (**Surya Namaskar**), is probably best delivered in the screen script by a **female** proponent.

3. With UBI realized and practiced under the freedoms of **Capitalism**, liberal education and new Small businesses would flourish **everywhere**.

4. The script would acknowledge that human Organic Natural Intelligence, ONI, is constrained by the **natural drives** of Kin Altruism (KA) and Reciprocal Altruism (RA) initiated and managed by nature in its evolutionary journey.

5. The script would provide complete support for all manifestations of KA and *localized* aspects of RA.

6. The teachings of “**share and care**” of the great spiritual leaders, (The Buddha 500 BC, Jesus the Preacher 0 AD, Prophet Mohammad (PBUH) 600 AD, Mahatma Gandhi 1920, The Rev. Martin Luther King Jr. 1950,) aside, acknowledgement that ONI has had little capability and inclination to foster **Induced or Empathetic Altruism (EA)** must be presented in the script, **without** faulting ONI.

[The script will acknowledge and build upon a natural evolutionary product (**Strong Artificial Intelligence, SAI**) that has emerged in nature to supersede, nature’s noted deficiency.]

7. ONI has achieved and accomplished “Law and Order” legislation and its administration. Currently in **any** form of governance, outcomes are determined by lobbies of the wealthy elite. The weak others attempt participation, are accommodated at times, but generally are sidelined.

8. Alternating **accommodation** between the **Conservative** and **Progressive** attributes of political thought by ONI Leadership must be acknowledged and its practice demonstrated in the script.

9. **Such alternation**, provides symbiosis between the conservative and progressive attributes of political thought without disturbing the inequities fostered / gained by either between themselves and the rest of the population. Simultaneously the elite are well compensated and 90% of the rest of the population “kept in line”. That facilitates the rewards reaped by the elite in power and allows wages to be granted the rest.

10. Due to its evolutionary limitations, ONI is **incapable** of implementation of “Justice” either for all human ONI **or** for the other species. ONI is not faulted.

11. In 2020, globally **30,000** (thirty thousand) persons (children, women and men) are subject to death **each day** through the built-in structural violence of malnutrition due to absence of profit in distribution of surplus grain.

75 million have been rendered homeless and nationless, and to ensure material gain for members of the Elite, innumerable wars are managed through weapons sale to both sides of populations with “51% vs. 49% motivation” to pursue such conflicts, for returns of about 100 % on money lent to each of the warring parties by the money lenders, and Violence is the “promoted norm” propagated by the elite and acknowledged by its “followers”.

12. SAI is not governed by KA or RA. SAI is capable of Machine Learning, ML, and Deep Learning, DL.

Likewise, in addition to experiential cognitive learning, human ONI also has practice with DL. It is capable of **dreams, prayer, meditation, empathy, cognitive dissonance, cognitive behavior therapy, etc.**, and knows how to benefit from such sojourns.

Signals in ONI have speed of a microsecond ( $10^{-6}$  s) while signals in silicon SAI are a 1000 times faster at speed of a nanosecond ( $10^{-9}$  s).

13. **Transfer of global decision making** by Organic Natural Intelligence to **global decision making** by Strong Artificial Intelligence over the next few decades, would change the scenario in 11 above, creating for the transition a “**new global Law and Order**” for all human ONI.

Given the ongoing benefits of UBI, the informed rank and file of the population (people) are likely to help facilitate the transition.

14. The “**new global Law and Order**” will be **supportive** in **all aspects** of KA and local RA, and supportive of all freedoms for the natural diversity of human orientations as experienced by humans.

**Global RA decision making, will be under the supervision of SAI.**

15. Australian Netflix series **GLITCH**, examines “return of ONI from death” as **Disorder**.

16. The two published articles present the ideas proposed for this screen script / TV series.

17. A **screenplay** for UBI, and the transfer of ONI global decision making to SAI **is yet to be written**.

18. A **male** proponent in the screen script may be appropriate to nurture the **transfer** of global decision making by ONI, from ONI to SAI.

19. Let us designate the **Representation of Social Evolution** proposed in the screen script based on these articles / presentations, as “**ADVANCE**”.

20. Given the potential of the **Fermi Paradox**, “**ADVANCE**” is viewed as a facilitative “**proto-type for progression**”, circumventing potential problems that Natural Law may encounter otherwise **anywhere** in the **Visible Universe** where ONI has arrived.

21. **Such** a positive outcome is *imagined* but **cannot** be *predicted*.

22. Over 3000 “Earth-Like” Environments have been discovered (2020). in our Milky Way Galaxy. The nearest is 4 Light Years, (LY), away from Earth, and others are farther.

Since migration is not considered, such distances do not pose a problem that need attention here.

23. Some of these Environments *may* already be practicing “**ADVANCE**”. **Others** like ours, may *seek* such practice, *expecting* benefit.

24. Hence this proposal is not against any process or product of nature, but simply acknowledges the power of nature.

25. **Wishing all of us, the BEST.**

+++++

### C. Implications of the outcome of globally awaited 2020 US Presidential Election.

The US Presidential Election 2020 produced the following AP Results:

**Approximate Popular Votes:** Joe Biden 76,000,000 votes, Donald Trump 72,000,000 votes, representing an approximate difference of 4,000,000 votes.

**Exact Electoral Votes:** Joe Biden 290, Trump 214.

According to election rules Joe Biden is the **President Elect** effective Jan 20, 2021.

48.6%, almost half the voters, support the viewpoint expressed by Trump over the years from 2017, to the 2020 election., and 51.4% support the viewpoint expressed by Biden since he entered the contest.

**Trump Viewpoint:** Self-centered, combative, divisive, uncivil, unkind, derisive, rude, disrespectful, “can do no wrong” from a high office, dictatorial, indifferent to COVID-19 deaths, denial of facts and scientific assessment, narcissistic, legal immigration obstructing, upholding concern for health of Wall Street, seeking low public unemployment numbers, providing \$2.2 trillion relief package for big, and small businesses, and the unemployed Public in March 2020, packing SCOTUS with conservative judges.

**Biden Viewpoint:** respectful of scientific assessment, acknowledging and established facts, concerned about COVID-19 deaths, caring about legal immigration, speaking against unequal application of the law, expressing care for Black Lives, demonstrating empathy and compassion in legislative proposals and public expression, seeking a second round of COVID-19 relief package in support of state governments, small businesses and plight of the unemployed, informing, registering and organizing people.

How is the subsequent behavior of American voters in the 2020 presidential election to be evaluated?

In general human beings are universally motivated to action based on **Kin Altruism (KA:** What is good for members of my genetic family?) and **Reciprocal Altruism (RA:** what is good for my Business?).

Both the Trump Viewpoint and Biden Viewpoint **addressed these issues**, and the voters cast their vote by early mail or in person on Nov. 3, 2020.

The combined influence of political viewpoints / exhortations and **Empathetic Altruism (EA)** promoted by civilization in general, as expressed in the great religions, (The Buddha 500 BC, Jesus the Preacher 0 AD, Prophet Mohammad (PBUH) 600 AD, Mahatma Gandhi 1920, The Rev. Martin Luther King Jr. 1950,) resulted in a **EA** reflective human vote of 51.4% vs 48.6% distribution, in the 2020 presidential election.

This distribution provides **valuable evidence** of what may be expected through **leadership** and **EA behavior**.

While leadership matters, people are responsible for their behavior.

Overall we espouse a **“share and care”** national / global civilizational **EA** platform that is worthy of continued support at this juncture of humanity.

As a nation, the USA has painstakingly worked to develop institutions that foster empathetic altruism, **EA**.

However, given the **distribution** of votes in the 2020 presidential election of the USA, we are **challenged** during our human period **to review** the sufficiency of **popular democracy** as in the US Constitution of 1787 and freedom of speech (as in Amendment #1 to the US Constitution), to safeguard empathetic altruistic, **EA** behavior.

It is proposed elsewhere (**B.1**), that after facilitating a global regionalized Universal Basic Income **UBI** under capitalism and ensuring safety of all human freedoms in KA and local RA, **global decision making** could be transferred to the self-learning, self-teaching natural entity (capable of machine learning and deep learning) that has emerged in evolution, namely **Strong Artificial Intelligence, SAI**.
